

J3500

A NEW LEVEL OF RUGGED MOBILE PERFORMANCE WITH THE MOTION J3500

It's lightweight. It's rugged. And it's packed with integrated features that provide the performance, manageability and security your mobile workplace demands. Introducing the J3500 Tablet PC from Motion Computing®, with Intel® vPro™ Technology. Designed specifically with the mobile field professional in mind, this robust device takes powerful computing directly to the point of service.

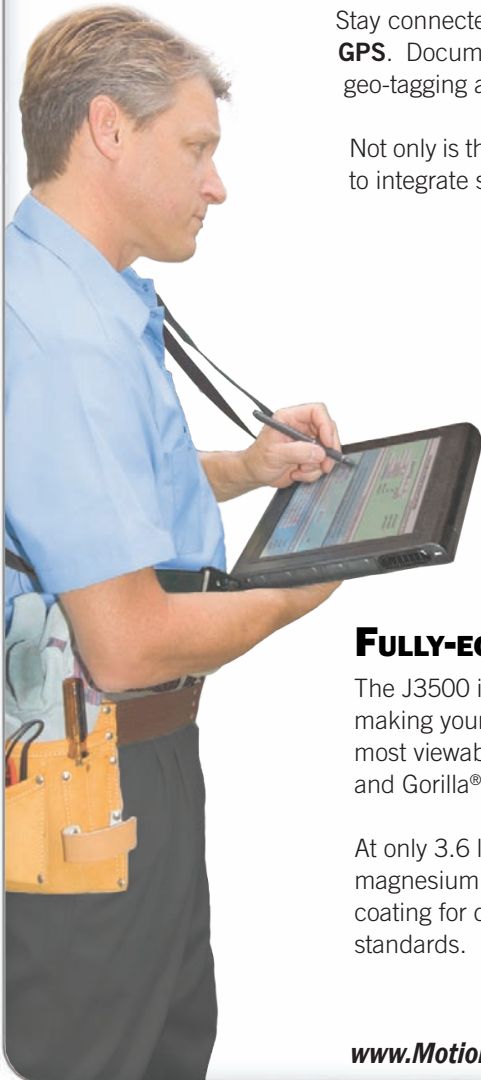

GET READY FOR SEAMLESSLY-INTEGRATED POWER.

Power through your workday with the J3500 rugged Tablet PC. Now with up to the Intel® Core™ i7 vPro™ Processor, the J3500 offers uncompromising levels of security, power and manageability. With enhanced integrated features, as well as all the standard capabilities you have come to expect from a Motion® Tablet PC, the J3500 offers more flexibility and storage than ever.

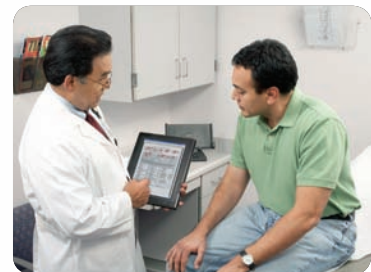

Opt for the **dual touch screen** with palm rejection technology and with just a pinch or tap of your fingers, you can scroll, pan, rotate and zoom your way through your workday. Touch interaction makes scrolling through long web pages or documents, looking up information on the Web, or navigating the task bar quick and easy. Switch to the digitizer to complete forms, capture customer signatures or input handwritten data.

Stay connected with the integrated WiFi 802.11 a/b/g/n and enhanced **Gobi™ connectivity with integrated GPS**. Document job site activities or take patient photos with the J3500's 3.0MP digital camera. Use geo-tagging and date stamping to document proof of work in seconds.

Not only is the J3500 equipped with a **dual hot-swappable battery** design to extend the workday, it's also built to integrate seamlessly with enterprise applications, so adding a J3500 to your workplace is simple.

Take your J3500 with you no matter where work takes you.

The perfect balance of performance, power and durability for any work environment.

FULLY-EQUIPPED, RUGGED AND FLEXIBLE.

The J3500 is tough enough to survive harsh mobile work environments, making your mobile job more productive. For the strongest, brightest, most viewable display, you can choose Motion View Anywhere Display® and Gorilla® Glass for improved durability.

At only 3.6 lbs! the J3500 might seem like a lightweight—but an internal magnesium frame for structural rigidity, port covers and a rubberized coating for dampening shock help it to meet IP-52 and MIL-STD-810G standards.

Powerful, Rugged Mobile Computing at the Point of Service

ENSURE A SECURE, ROBUST MOBILE WORK ENVIRONMENT.

Work more safely. Work more securely. And never sacrifice performance. Improved security features on the J3500 offer the latest advancements to protect your system. With available vPro technology, IT can remotely isolate PCs from the network for upgrade or repair, and the security designed into the PC hardware provides anti-theft capabilities. Work any place at any pace, confident that your sensitive information is safe.

ACCESSORIZE YOUR SOLUTION TO MEET EVERY NEED

FlexDock Docking Station

This sleek docking station has a battery charger bay and four USB, DVI-D, Ethernet, audio and display. It can be directly mounted to VESA compatible devices, or used as a desktop replacement.

Battery Charger

An external bay to charge additional batteries. The charger's small footprint saves valuable desk space while the LED indicates battery charge status. Rapidly charge additional batteries within 2 hours.

*Additional batteries sold separately

Mobile Keyboard

The durable J-Series Mobile Keyboard is cable-less, reliable and extremely light at less than 1 lb. Attach it to the back of any J-Series Tablet PC for easy transport.

Work Anywhere Kit

For an easy, safe way to carry your J-Series Tablet PC, add a Work Anywhere Kit. With a flip cover for additional screen protection, a pouch to carry an extra battery and an attachable strap the Work Anywhere Kit is a must have accessory for any J-Series Tablet PC.

Mobile Dock Solution

With the Mobile Dock mounting and docking solution, the Motion J3500 can be mounted in almost any location with port replication and secure locking feature.

On-the-go note taking and markup.

Flexible Input

Simply and efficiently navigate, input information and sign forms with the precision of the digitizer pen or the familiarity and ease of your finger.

Viewability in any environment.
